

# Carden Academy Summer Program 2017

Our Summer Program is tailored to fit the needs and interests of each child. Each day, the students will participate in two class rotations and one whole group lesson. The students will be split into groups according to grade level. Weekly classes offered include writing, drama, math, science, reading, art, sports/games, cooking, jewelry making, and engineering. For new students and incoming Kindergarteners, we offer "Intro to Carden" class to get a head start on the year! Reading and math will be taught using the Carden curriculum, allowing each child to work at his or her own pace. Students receive small group instruction as well as independent practice.

Please see the registration form and daily schedule for more information. For any questions please contact the school office at (408) 265-3392 or [summerprogram@cardensv.com](mailto:summerprogram@cardensv.com).

Wednesday: Special Ectivity  
Thursday: Water Play  
Friday: Movie & Camp Awards  
3:30-6:00 Afternoon Extended Care (no fee)

## **Class Descriptions**

### **Math**

Using the Carden Method of teaching, math instruction will be delivered in small groups to cater to the needs of each child. Computational skills as well as logical thinking and problem solving will be included within the curriculum. Students in need of extra practice during the summer will be able to prepare for next year and those seeking math enrichment will be able to advance their mathematical abilities.

### **Introduction to Carden**

This class is designed for incoming Kindergarteners and new students at Carden. We begin the week with a campus tour and general rules and routines. We will practice the Carden morning opening, proper Carden etiquette and begin the Carden vowel chart. This class is designed to give new students a head start on the school year. The class will be the same the first and last weeks of camp.

### **Art**

Art class will include the study of artists and techniques as well as projects made from a variety of mediums. Paint, sculpture, drawing and bead work will be some of the areas in which we will work.

### **Reading**

Students will be assessed and placed in a reading group. Using the Carden Method, we will practice reading rhythmically, sentence analysis, and more. Reading Comprehension and vocabulary will also be areas of focus. This class is for students who love to read as well as those that may need more practice to increase their confidence in reading.

### **Science**

Hands-on science experiments will be used to learn about the main areas of elementary science physical science, life science, earth science, and space and technology. Budding scientists will enjoy this fast paced class while working on problem solving skills and creativity.

### **Cooking**

Students will learn how to follow a recipe to create a culinary delight. We will practice our math skills by doubling recipes when necessary, study foods from different cultures, and most importantly, enjoy our hard work!

### **Jewelry**

Making Loom bracelets, duct tape bracelets, and beading are some of the activities your child can enjoy in jewelry making class. We will make a new project each day and the students will take home their beautiful works of art.

### **Sports/Games**

Our sports/games class will include body movement, board games, indoor and outdoor games, card games and more. Each day will include a new challenge and skill for the students. The students will learn how to play different sports and games along with all the rules and strategies of the games.

### **Writing**

Poetry, creative writing, narrative writing, and storytelling are some of the genres we will cover in our writing class. We will follow the proper writing process, having fun along the way. Each week will offer a new topic of study for your child.

### **Engineering**

Critical thinking skills will be tested and formed as students try to find the most efficient way to solve a problem. The study of physics and building projects will play a major role in this class.

### **Drama**

Students will practice writing and performing a variety of short plays and skits. They will create scenery and costumes and study theater associated vocabulary.
